June 2022 – December 2023

Istanbul, Türkiye

- Provided academic, social, and administrative support to international students.
- Facilitated communication and adaptation for students in a new environment.
- Organized and supported student events to enhance international student experience.

KEY PROJECTS

MyHr – Enterprise HR ERP System

March 2026 – Present

Personal Project

- Implemented Clean Architecture with separated concerns across presentation, application, domain, and infrastructure layers.
- Developed HR & Payroll module for employee management, compensation tracking, and payroll processing.
- Created Accounting & Finance module for financial operations and reporting.
- Integrated Hangfire for background job processing and AutoMapper for efficient object mapping.

Technologies: ASP.NET Core MVC (.NET 9), Entity Framework Core, Clean Architecture, Hangfire, AutoMapper, SQL Server

Favourite Restaurant – Full-Stack Ordering Platform

2024 – 2025

Personal Project

- Architected multi-layered solution with separation of concerns (Web, Application, Domain, Infrastructure).
- Implemented dual authentication strategy using ASP.NET Identity cookies and JWT bearer tokens.
- Integrated Stripe payment gateway with webhook handling for secure transaction processing.
- Built real-time order tracking system using SignalR for live updates to customers and restaurant owners.
- Developed loyalty points system with automated voucher generation and promo code validation.
- Created background job scheduling with Hangfire for payment verification and reconciliation.
- Implemented Firebase push notifications for order status updates.
- Added multi-language support (English/Arabic) with localization.
- Built comprehensive admin dashboard with user, restaurant, menu, and order management.

Technologies: ASP.NET Core MVC (.NET 9), Entity Framework Core, SignalR, Hangfire, Stripe API, Firebase Admin SDK, Google OAuth, EPPlus, QuestPDF, AutoMapper, SCSS/Sass

EDUCATION

Bachelor's Degree in Software Engineering

Graduated: 2023

Uskudar University | Istanbul, Türkiye

Full Stack Developer Program

December 2023 – December 2024

A Plus Academy

- Intensive training in full-stack web development covering front-end and back-end technologies.
- Focus on building scalable and robust web applications.
